WIDED ROUATBI

UX/UI Designer & Product Designer

Full Stack Senior Designer (AI-Augmented / AI-Native)

Sousse, Tunisia · widedrouatbi@gmail.com · +216 54 367 147 · Portfolio

PROFILE

UX/UI & Product Designer with 6 years of experience across banking, insurance, e-commerce and travel. I design coherent design systems and complex user journeys, grounded in user research, information architecture and close collaboration with product and engineering teams, to deliver interfaces that are both usable and aligned with business goals.

CORE STRENGTHS

- AI-augmented design practice: integrates AI tools (Figma AI, generative prototyping, LLM-assisted specs) into the design process to move faster from insight to high-fidelity prototype including built and shipped independently.
- Design systems at scale: builds and evolves coherent design systems across multiple client verticals (banking, e-commerce, travel, real-estate taxation).
- Research-driven problem solving: turns user interviews, usability testing and competitive analysis into well-argued design decisions.
- Cross-functional collaboration: works in real time with product and engineering teams on complex, high-stakes user journeys.
- Mentorship & design leadership: trains and mentors junior designers and interns; has taught UX/UI design at university level.

PROFESSIONAL EXPERIENCE

Full Stack Senior Designer (AI-Augmented / AI-Native) — Neoshore *March 2026 – Present*

- Co-designed mobile and web applications with a strong UX focus, from framing to high-fidelity prototypes.
- Analyzed client needs and proposed optimized user journeys.
- Worked closely with engineering teams to ensure feasibility and implementation quality.
- Main project: Mathis BS (SaaS platform for property tax management for social housing landlords).

Expert Lecturer — UX/UI Design — Institut Supérieur des Beaux-Arts de Sousse *Sep 2024 – Jul 2025*

(concurrent with Satoripop)

- Taught and mentored students in UX/UI design, design thinking and the foundations of digital product design.

UX/UI Designer — Satoripop *Feb 2022 – Sep 2025*

- Designed coherent design systems for clients in banking, e-commerce and travel.
- Created wireframes and interactive prototypes in real-time collaboration with developers.
- Conducted user interviews and prototype testing to improve the user experience.
- Mentored interns and junior designers: structured workflows and supported their skill growth.
- Notable clients: EY, Carrefour.tn, Five Guys, Attunea, Planet Tax Solution, among others.

UX/UI Instructor — GoMyCode *Oct 2021 – Jun 2022*

- Trained 20+ students in UX/UI design: theory, methodology and best practices.
- Provided pedagogical support and continuously improved course materials.

UX/UI Designer — Diginov / Design Code *Oct 2021 – Jan 2022*

- Co-designed mobile and web applications with a strong UX focus, working directly with engineering teams.
- Analyzed client needs and proposed optimized user journeys.

UX/UI Designer — WeAre Moon *Aug 2020 – Sep 2021*

- First professional immersion in UX/UI design, under the supervision of a senior designer.
- Contributed graphic concepts and visual assets for various client projects.

SKILLS

Design & Prototyping: Figma, Adobe XD, Illustrator, Photoshop, Claude, Lovable, Affinity
UX Research: User interviews, usability testing, FigJam, Notion
Methodologies: Design Thinking, Atomic Design, Design Systems, Agile/Scrum
Collaboration: Jira, Trello, Zeplin, ClickUp, Slack

EDUCATION

Master's Degree in Visual Design — Institut Supérieur des Beaux-Arts de Sousse
